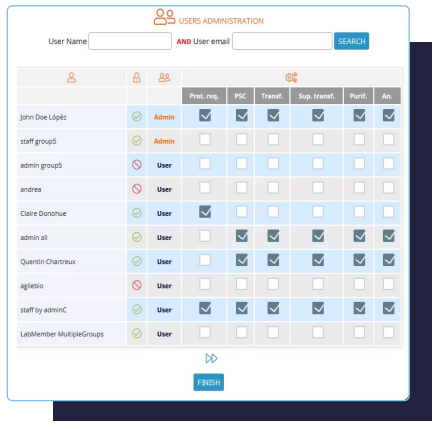
Protein production facility management



Protein Tracking System (PTS) is a network based application for protein production, purification and analysis management.

As a project manager, PTS allows the lab staff to follow different processes and task progressions in an organized interface.

PTS is suitable for academic labs, biotechs and pharma Companies interested in quality management of their protein production activities and interested in protein production followup.

- Quick access dashboard
- Unlimited projects/jobs
- Manage user level permissions
- Archive old projects
- Print client reports
- Link to LabCollector data/storage
- Easy activity monitoring
- Multilanguage interface
