

SNP Genotyping Manager

LabCollector LIMS Add-on

Dedicated to management and execution of SNP genotyping

SNP Manager helps to automatize your SNP genotyping workflow.

Combined with LabCollector **Samples** and **Documents** modules, the SNP Manager add-on allows users to manage tubes and plates containing markers: storage location, stock quantity, status (available, ordered...) and suppliers ordering with a few clicks.

Fully integrated with
LabCollector LIMS:

a collaborative database for life sciences

SNP Genotyping Manager

LabCollector LIMS Add-on

SNP genotyping made easy!
in 3 steps

1. **Picklist creation** based on your marker request list. Generation of instruction file for tube pickers to select the right markers (Tube Sorter and Floyd 2D...)

2. **Update** marker tube position by simply scanning your marker tube trays (works with our **Scanner Server**) or uploading predefined scan files.

3. **Export** instruction file to pilot the genotyping process (Fluidigm EP1).

Compatible with:

and more to come...

Fully integrated with **LabCollector LIMS:**
