1. Available methods in LSM web service

1.1. GET

1.1.1. Jobs

- Method: GET
- URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2)
- Optional search parameters:
 - datefrom
 - dateto
 - jobid (id or barcode)
 - sampleid (id or barcode)
 - assayid
 - status (by default only jobs in progress are returned, use status=all for view all jobs)
 - samplename
 - samplestatus
 - samplestatusdatefrom
 - samplestatusdateto
 - assaystatus
 - assaystatusdatefrom
 - assaystatusdateto
 - startedon
 - completedon
 - validatedon
 - batch
 - jobstatus
 - jobnumber
- Additional parameters:
 - parameterid & parametervalue to search by job parameter, sample parameter or assay parameter
 - searchmode: when searching by jobnumber, samplename or batch: searchmode indicates the mode (startswith, endswith, contains, strict-default-)
 - samplesearch: searches by barcode (S+ID or Sample name), regarding the barcode option set in lsm>admin>setup>job and samples naming. The search is strict and supports multiple values separated by comma
 - limit: to limit number of results add limit=N, being N the max number of jobs
 - return: by default the tags returned are <job>, <sample>, <assay> and <parameter>. Omit tags or select other tags as sample report in base64 and requester uses and managers is possible using the parameter return. The list of options for this parameter is return=job,sample,assay,parameter,samplereport,user,manager

1.1.2. Equipments

- Method: GET
- URL:
[http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2&getEquipmentList=1](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getEquipmentList=1)
- Optional parameters: id

1.1.3. Assays

- Method: GET
- URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2&getAssayList=1](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getAssayList=1)

- Optional parameters: id

1.1.4. Categories

- Method: GET
- URL:
`http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getCategoryList=1`
- Optional parameters: id

1.1.5. Sample Types

- Method: GET
- URL:
`http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getSampleTypeList=1`
- Optional parameters: id

1.1.6. Parameters

- Method: GET
- URL:
`http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getParameterList=1`
- Optional parameters: id, level (level=J returns job parameters, level=S returns sample parameters and level=A returns test parameters)

1.1.7. Requesters

- Method: GET
- URL:
`http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getRequesterList=1`
- Optional parameters: id, categoryid

1.1.8. Invoices

- Method: GET
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getInvoiceList=1`
- Optional parameters: id, datefrom, dateto, status, format (CSV | IIF), jobid, jobnumber

1.1.9. Batches

- Method: GET
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getBatchList=1`
- Optional parameters: batch, status (notfinished –default– | all | assigned | started | completed | approved)

1.1.10. Token

- Method: GET

- URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2&getToken](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&getToken)
- Required parameters: jobid or sampleid

1.1.11. Send token by email

- Method: GET
- URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2&sendToken](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&sendToken)
- Required parameters: jobid or sampleid

1.1.12. Send results to external sources

- Method: GET
- URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2&sendResults](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2&sendResults)
- Required parameters: jobid

Note: Send results back to external source only if the job have been created using our integration API (PWNHealth, 1Health, ORDRS, LabSoft)

1.2. POST

1.2.1. Create requesters

- Method: POST
 - URL: [http://\[my_labcollector_url\]/extra_modules/lsm/webservice/index.php?v=2](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2)
 - Required parameter: create
 - Example of *create*:
- ```
<requesters>
 <requester code='R01' name='Requester from API' taxNumber='12346789'>
 <billing address='One street' city='City' state='State' country='US' zip='99999' phone='555123123' fax='555123123' contactFirstName='Jane' contactLastName='Doe' contactEmail='jane@gmail.com' ></billing>
 <shipping address='One street' city='City' state='State' country='US' zip='99999' phone='555123123' fax='555123123' contactFirstName='Jane' contactLastName='Doe' contactEmail='jane@gmail.com' ></shipping>
 </requester>
</requesters>
```

### 1.2.2. Create job

- Method: POST
- URL: [http://\[my\\_labcollector\\_url\]/extra\\_modules/lsm/webservice/index.php?v=2](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2)
- Required parameter: create
- Optional parameter: notoken (if is set option the token is not sent on job creation, although the automatic token is ON)
- Example of *create*:

```
<jobs>
 <job number='job-api-006' requester='21' project="109">
 <parameter id='242' value='text'></parameter>
 <sample name='job-api-006-sample1' type='1' comment='notes1'>
 <parameter id='247' value='Female'></parameter>
 <assay id='1'></assay>
 <assay id='2'></assay>
```

```

 </sample>
 <sample name='job-api-006-sample2' type='1' comment='notes2'>
 <parameter id='247' value='Male'></parameter>
 <assay id='1'></assay>
 <assay id='2'></assay>
 </sample>
</job>
<job number='job-api-007' requester='21' project="Test new project code">
 <parameter id='242' value='text'></parameter>
 <sample name='job-api-007-sample1' type='1' comment='notes1'>
 <parameter id='247' value='Female'></parameter>
 <assay id='1'></assay>
 <assay id='2'></assay>
 </sample>
 <sample name='job-api-007-sample2' type='1' comment='notes2'>
 <parameter id='247' value='Male'></parameter>
 <assay id='1'></assay>
 <assay id='2'></assay>
 </sample>
</job>
</jobs>

```

Multiple jobs and multiple samples are allowed.

Attribute Requester supports id or text.

Attribute project supports id or text.

### 1.2.3. Append samples to existent job

Use the same notation of 1.2.2 Create job adding an extra parameter *appendsamplesifjobexist = 1*.

JobNumber must match and be unique. If the job doesn't exist a new job will be created. If job exists but is already completed it returns an error message.

### 1.2.4. Save results

- Method: POST
- URL: [http://\[my\\_labcollector\\_url\]/extra\\_modules/lsm/webservice/index.php?v=2](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2)
- Required parameter: result
- Example of *result*: <assays><assay uniqueid="1223"><result><parameter id="34" unit="mg" value="123"/><parameter id="35" unit="ml" value="456"/></result></assay></assays>

## 1.3. PUT

### 1.3.1. Upload files

- Method: PUT
- URL: [http://\[my\\_labcollector\\_url\]/extra\\_modules/lsm/webservice/index.php?v=2](http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2)
- Parameters:
  - upload (required)
  - file (required)
  - uniqueid (required): identifier of job-sample-assay
  - parameter (optional): supports parameter id or parameter name
- Response: OK 200

### 1.3.2. Link sample to module

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - sampleid (required): identifier of sample (sampleid or barcode). Supports multiple ids separated by comma
- OR
  - samplename (required): sample name
  - module (required): module name or short name
  - recordid (required): identifier of record in module
- Response: OK 200

### 1.3.3. Update sample

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - sampleid (required): identifier of sample (sample id or barcode). Supports multiple ids separated by comma
- OR
  - samplename (required): sample name
  - shipmentstatus(optional): Use 0 Submitted, 1 In transit, 2 Received, 3 Returned (supports number of label)
  - name (optional): new sample name
  - type (optional): new sample type
  - batch (optional): batch to be assigned to tests
  - Any sample parameter using parameter label or parameter id

### 1.3.4. Update sample status

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - sampleid (required): identifier of sample (sampleid or barcode). Supports multiple ids separated by comma
- OR
  - samplename (required): sample name
  - status (optional): started | completed | approved
  - startedby (optional): valid User ID in LSM. If status is set to 'started' and this parameter is not received, the default operator selected in API settings will be used instead
  - startedon (optional): datetime (YYYY-MM-DD hh:mm:ss). If status is set to 'started' or 'startedby' is set, and this parameter is not received, current date will be used
  - completedby (optional): valid User ID in LSM. If status is set to 'completed' and this parameter is not received, the default operator selected in API settings will be used instead
  - completedon (optional): datetime (YYYY-MM-DD hh:mm:ss). If status is set to 'completed' or 'completedby' is set and this parameter is not received, current date will be used
  - validatedby (optional): valid User ID in LSM. If status is set to 'approved' and this parameter is not received, the default operator selected in API settings will be used instead

- validatedon (optional): datetime (YYYY-MM-DD hh:mm:ss). ). If status is set to 'approved' or 'validatedby' is set and this parameter is not received, current date will be used
- assayid (optional): if it is set, the update is applied only to this assay
- Response: OK 200

*Note: startedby, completedby and validatedby also accepts LabCollector Contact ID if it is preceded by 'LC', example: LC58*

### 1.3.5. Start a batch

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - batch (required): batch name
  - startedby (optional): user id valid in LSM (or 1 for super admin).
  - startedon (optional): if not set, current date is used

*Note: startedby also accepts LabCollector Contact ID if it is preceded by 'LC', example: LC58*

### 1.3.6. Update job

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - jobid (required): identifier of job (job id or barcode). Supports multiple ids separated by comma
  - Any job parameter using parameter label or parameter id

### 1.3.7. Accept/Reject a job

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - jobid (required): identifier of job (job id or barcode). Supports multiple ids separated by comma
  - acceptance (required): accept | reject | hold
  - comment (optional): a text comment to the acceptance/rejection
  - sendnotification (optional): 0 | 1 (send notification by email)

### 1.3.8. Order a job quoted

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - jobid (required): identifier of job (job id or barcode). Supports multiple ids separated by comma

- order (required): 1
- purchase order (optional): purchase order

### 1.3.9. Update requester

- Method: PUT
- URL: `http://[my_labcollector_url]/extra_modules/lsm/webservice/index.php?v=2`
- Parameters:
  - requesterid (required): identifier of requester (requester id or code or name)
  - any requester field (optional): code, name, taxNumber, discount, company, prefix, registrationid, onPortal, reportPassword, category
  - any requester billing field (optional): billing.address, billing.city, billing.state, billing.country, billing.zip, billing.phone, billing.fax, billing.contactFirstName, billing.contactLastName, billing.contactEmail
  - any requester shipping field (optional): shipping.address, shipping.city, shipping.state, shipping.country, shipping.zip, shipping.phone, shipping.fax, shipping.contactFirstName, shipping.contactLastName, shipping.contactEmail

## 2. Authentication

One HEADER parameter is mandatory:

-Key: X-LC-APP-Auth

-Value: The token you can view/generate in LabCollector -> Admin -> Others -> Setup -> Web services API

## 3. Tool

You can try to retrieve data from or send data to the API with some software app as Postman (<https://www.getpostman.com/>).

## 4. Screenshots

### 4.1. GET

#### 4.1.1. Get list of jobs in progress
