

PLANTS MANAGER

The Plants Manager add-on for LabCollector is a network based system that enables laboratories to keep track of seeds and plant growing in experimental trays and fields.

Manage your plants experiments from seeds to harvest

All seeds generations will be tracked. Barcode identification support and storage management are included. Plants Manager is suitable for labs interested in a friendly application for experimental greenhouse management.

Integrated management tools:

- Custom fields editor
- Construct identification
- Seed generation tracker
- Storage manager
- Barcode identification
- Plant generation navigation
- Files imports
- Multilanguage interface

Plant ID	Reference	Type	Date	Tray Name	Seed No	Plant ID (parent)	Plant Name	Researcher	Ecotype	Age	Harvest Date	Project Code	Actions

**List Maker
APP.**

Scan Samples & create lists

ListMaker can easily create templates with many types of columns, (text, numbers, barcodes, locations and dates). Share results directly via email. Send the lists to the LabCollector module of your choice and update the records in real time.
